SBC

Company Profile

Senior Block Chain LLC. Enterprise software and digital platforms, designed and built in Oman.

About SBC

Senior Block Chain LLC is an Oman-based software company, established in Muscat in 2022.

We bring business analysis, software engineering, system architecture and user experience design together to build digital platforms around the way an organization works.

Our work spans ERP and CRM, web and mobile applications, AI-enabled automation, secure document services and blockchain. We connect these through APIs, business workflows and shared data.

We work on defined projects: from analysis and interface design through development, integration and testing, to deployment on the client's own servers or cloud and handover to the client's team.

Established **2022**	Head office **Muscat, Oman**	Commercial registration **1414853**
OCCI membership **First grade**	Legal form **LLC**	Structure **Independent**

What you can count on

Fixed scope and price
You know what you get and what it costs before the project starts.

Your infrastructure
SBC never hosts your systems or your data.

No subscriptions
You pay for a defined project, not for monthly access.

NDA on request
Your processes and documents stay confidential from the first meeting.

What we do

Consulting, engineering and integration for new digital products and for the modernization of existing business systems.

Business & technology consulting

Business process analysis, ERP planning, software architecture, workflow design and digital product strategy.

Enterprise applications

ERP, CRM, approval workflows, management dashboards, reporting and internal operational systems.

Web & mobile development

Responsive websites, customer portals, custom web platforms, iOS and Android applications and interface design.

AI & automation

AI assistants, natural language processing, machine learning, predictive analytics, computer vision and business process automation.

Secure document solutions

Controlled file sharing, document access, digital rights management, dynamic watermarking, encrypted storage and activity tracking.

Commerce & communications

Online stores, payment and logistics integration, order management, call centre systems, VoIP, PBX, WhatsApp and email workflows.

Blockchain & decentralized systems

Blockchain architecture, smart contracts, decentralized applications, tokenization, wallet-based authentication and Nostr integration.

Integration & infrastructure

API development, database design, third-party system connections, DevOps and deployment on your own servers or your own cloud.

Flagship platform · Enterprise Resource Planning

SBC ERP

The intelligent core of your business.

SBC ERP is the operating system of a modern company. Finance, HR, procurement, inventory, projects, assets and sales run on one platform and one database, so every department works from the same real-time truth.

- Editions for oil & gas, logistics and real estate & construction
- AI & blockchain built in
- Arabic & English, on your own infrastructure

Core modules

Finance & accounting
HR & payroll
Procurement
Inventory & warehouses
Projects & contracts
Assets & maintenance
Sales & CRM
Reporting & BI

Industry editions

Oil & gas
Logistics
Real estate & construction
Trading

Finance & accounting

General ledger, payables, receivables, budgeting, multi-currency and Oman VAT-ready invoicing.

Procurement & inventory

Requisitions, tenders, purchase orders, vendors and multi-warehouse stock control.

HR & payroll

Employee records, attendance, payroll, leave and Omanisation tracking.

Projects & assets

Project costing, contracts, asset register and preventive maintenance.

AI forecasting & automation

Demand and cash-flow forecasts, automatic invoice reading and an ERP assistant in Arabic and English.

Real-time dashboards

Live KPIs and reports for every level of management, from the field to the boardroom.

Security and control

- Role-based access with approval workflows
- Encryption in transit and at rest, automated backups
- Full audit log for every transaction
- Runs on your servers or your own cloud, so data stays where you choose

Products

SBC Smart Accounting
Small Business Accounting & E-Invoicing

Double-entry accounting for small and medium businesses: invoices, VAT, bank, stock and reports, ready for Fawtara e-invoicing.

Fawtara Integration Hub
Oman E-Invoicing Integration

Connects accounting and ERP software to Fawtara, Oman's e-invoicing system: invoices converted, validated, sent and tracked.

SBC FlowEngine
Workflow & Approval Management

A no-code engine for workflows, forms and approvals, with your Delegation of Authority, deadlines and AI built in.

SBC Flow
Project Management

Tasks, timelines, budgets and resources in one workspace for teams that deliver.

SBC Agora
Meetings & Live Translation

Plan, run and follow up on meetings with real-time translation and AI-generated minutes.

SBC Commerce
E-commerce & POS

Online store, point of sale, inventory and customers unified in one real-time platform.

SBC Beam
Video & Voice Calling

A dedicated video and voice calling platform under your brand, hosted where you choose.

SBC Cipher
Blockchain Secure Messenger

A private, end-to-end encrypted messenger with blockchain-verified identities.

SBC Relay
WhatsApp Business Client & API

A multi-agent WhatsApp Business workspace and API for sales, support and notifications.

SBC Beacon
Telegram Client & API

A team workspace and API for managing Telegram chats, channels, groups and bots.

SBC Forge
AI Agent Builder

Create and deploy custom AI agents that use your own data and tools, without writing code.

SBC Ride
Ride-Hailing & Taxi Platform

Rider app, driver app and live dispatch under your brand, for taxi operators, fleets and cities.

Oman BidPilot AI
AI Tender & Proposal Automation

AI that reads tender documents, extracts every requirement, checks the BOQ and drafts your technical and commercial proposal.

AI Insurance Operations
Insurance Broker Management

Insurance operations for brokers and insurers: forms, requests, quote comparison, policies and renewals, with AI doing the admin.

15 products, one team

Each one is deployed on your own servers or your own cloud and configured to your processes.

sbc.om/products

How we work

Every engagement is a project with a fixed scope, delivered on your own infrastructure and handed over to your team.

1 **Discover**
A free first consultation, then workshops to map how your teams really work.

2 **Propose**
A written proposal with a fixed scope, milestones, timeline and price.

3 **Build**
Delivered in milestones you review, with testing and security built in.

4 **Deploy**
Installed on your own servers or your own cloud, in Oman or wherever you require.

5 **Hand over**
Your users are trained in Arabic and English, and your team takes over the running system.

People

Maryam Daraei Fard
Business analyst
Leads business requirements and process analysis.

Selected work

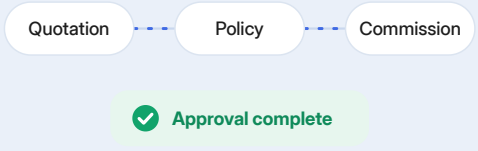

Enterprise Resource Planning

SBC ERP

One connected platform for finance, people, supply chain and operations, with AI and blockchain built in.

- Editions for oil & gas, logistics and real estate & construction
- AI & blockchain built in
- Arabic & English, on your own infrastructure

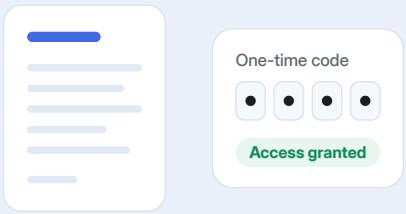

Insurance brokerage ERP

AmeenHub

AmeenHub brings insurance brokerage operations and business administration into one platform. It connects customer and quotation records with policies, commissions, finance, human resources and operational workflows.

- Customers, leads, quotations and policy processing
- Insurers, products and commissions linked to each transaction
- Accounting, salaries and management reporting

Built for Regal Insurance Management Services LLC, Oman, 2025

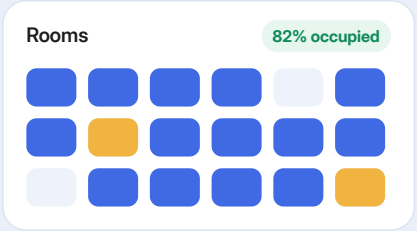

Secure document sharing

SBC Files

A document-sharing platform for organizations that handle confidential files. Administrators control who can open a file, how it is viewed and what happens to it afterwards.

- Recipient permissions and one-time-code verification
- Encrypted storage and dynamic watermarking
- Audit trails and viewer activity tracking

Hospitality operations

Hotel Hub

Hotel Hub centralizes reservations, rooms, guest requests and the daily workflows of hotel teams, with role-based access for each department.

- Reservations, rooms and guest requests
- Housekeeping, tasks and team communication
- Billing, financial tracking and analytics

Selected work

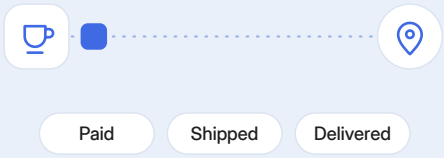

Sports & engagement

Game It

A motivation platform for sports clubs. Players earn points, badges and achievements for activity and participation, while clubs and coaches follow their progress.

- Points and achievements linked to participation
- Player progress and performance tracking
- Club, coach and rewards administration

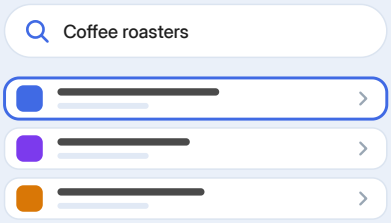

Connected commerce

Coffee store

A specialty coffee store built for the Oman market, connecting the product catalogue with local payments, inventory, customer accounts and delivery.

- Local payment integration, orders and inventory
- Aramex and Nool logistics connections
- WhatsApp and email order updates, invoices and reminders

Business discovery

Business Directory

The SBC Business Directory gives companies a structured way to present their services and reach their audience, with marketing tools and digital features in one platform.

- Structured business and service listings
- Marketing tools and audience engagement
- Administrative and customer-facing interfaces

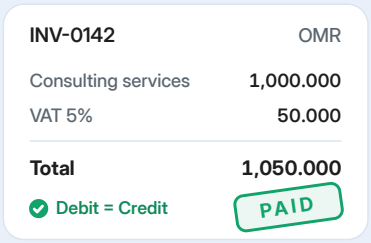

Technology experience

Blockchain & digital assets

Our work extends to decentralized applications, smart contracts and blockchain architecture.

- Blockcore: open-source platform for custom blockchains
- Angor: Bitcoin crowdfunding with Nostr communication
- Digital asset exchanges: matching engines and wallets

Selected work

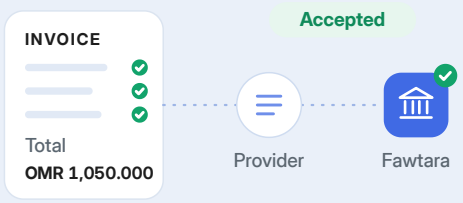

Small Business Accounting & E-Invoicing

SBC Smart Accounting

Double-entry accounting for small and medium businesses: invoices, VAT, bank, stock and reports, ready for Fawtara e-invoicing.

- Double-entry accounting, kept simple
- VAT and Fawtara e-invoicing ready
- AI reads invoices and sorts expenses

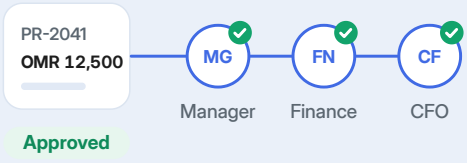

Oman E-Invoicing Integration

Fawtara Integration Hub

Connects accounting and ERP software to Fawtara, Oman's e-invoicing system: invoices converted, validated, sent and tracked.

- Works with your existing accounting or ERP
- Every invoice validated before it is sent
- Every status and error in one place

Workflow & Approval Management

SBC FlowEngine

A no-code engine for workflows, forms and approvals, with your Delegation of Authority, deadlines and AI built in.

- Visual, no-code process designer
- Delegation of Authority built in
- Works on its own or with your ERP

Project Management

SBC Flow

Tasks, timelines, budgets and resources in one workspace for teams that deliver.

- Board, list & Gantt views
- Budget & resource tracking
- Fully bilingual: Arabic & English

Selected work

Meetings & Live Translation

SBC Agora

Plan, run and follow up on meetings with real-time translation and AI-generated minutes.

- Real-time translation in any supported language
- AI transcripts & minutes
- Built for boards & committees

E-commerce & POS

SBC Commerce

Online store, point of sale, inventory and customers unified in one real-time platform.

- Online store + POS in one
- Multi-branch real-time inventory
- VAT-ready invoicing

Video & Voice Calling

SBC Beam

A dedicated video and voice calling platform under your brand, hosted where you choose.

- HD video & voice
- Your brand, your servers
- APIs & SDKs for developers

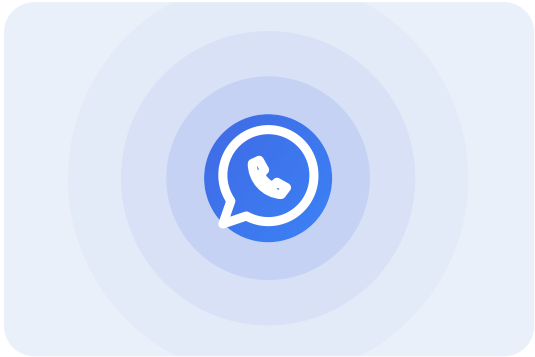

Blockchain Secure Messenger

SBC Cipher

A private, end-to-end encrypted messenger with blockchain-verified identities.

- End-to-end encryption
- Blockchain-verified identities
- Fully private deployment

Selected work

WhatsApp Business Client & API

SBC Relay

A multi-agent WhatsApp Business workspace and API for sales, support and notifications.

- Official WhatsApp Business Platform
- Multi-agent shared inbox
- Developer API & webhooks

Telegram Client & API

SBC Beacon

A team workspace and API for managing Telegram chats, channels, groups and bots.

- Multi-account team workspace
- Channels, groups & bots
- Developer API & webhooks

AI Agent Builder

SBC Forge

Create and deploy custom AI agents that use your own data and tools, without writing code.

- No-code agent builder
- Answers from your own data
- Deploy on any channel

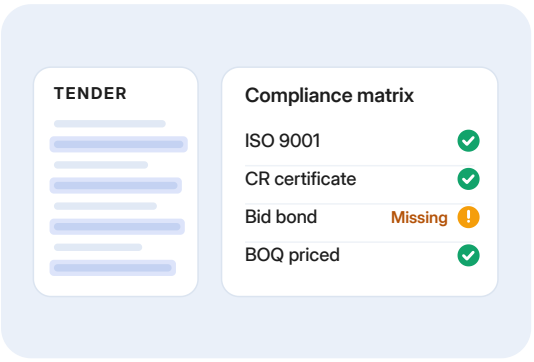

Ride-Hailing & Taxi Platform

SBC Ride

Rider app, driver app and live dispatch under your brand, for taxi operators, fleets and cities.

- Rider, driver & dispatch apps
- Smart matching & live tracking
- Your brand, fares and data

Selected work

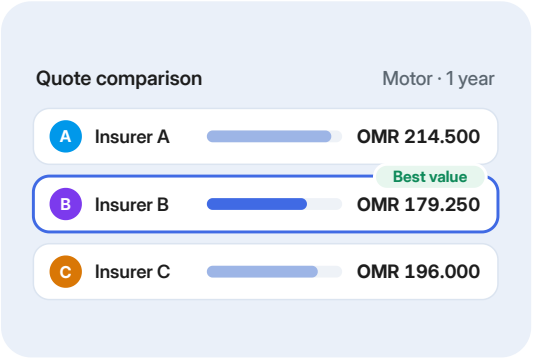

AI Tender & Proposal Automation

Oman BidPilot AI

AI that reads tender documents, extracts every requirement, checks the BOQ and drafts your technical and commercial proposal.

- Reads PDF, Word and Excel tender packs
- Compliance matrix and BOQ checks
- Drafts proposals your team approves

Insurance Broker Management

AI Insurance Operations

Insurance operations for brokers and insurers: forms, requests, quote comparison, policies and renewals, with AI doing the admin.

- Quotes from insurers compared side by side
- Renewals tracked before they lapse
- AI fills forms from client documents
